Spreadsheet Basics

Use Spreadsheet Functions to solve the following use-case:

1. Subhash is the class teacher of 11th Standard and he is required to make an attendance record. For making this record, he is required to collect attendance from various subject teachers. These records are in different unstructured order. How would Subhash recognise the students having attendance **below 75 percent**?
2. Find the Name of Students having attendance **greater than 75 percent** combined in Physics, Chemistry, and Mathematics.

****Refer to the provided spreadsheet.***
